Reagecon – an Irish company that is world leader in the development and manufacture of chemical standards and reagents – is pleased to announce a new range of USP ready to use solutions. These solutions have been developed as part of our on-going Research and Development program. A representative sample of this new range is contained here. For USP products not listed, please contact any of our Customer Relationship Managers. These USP solutions, which are not available from any other manufacturer, bring you multiple benefits that include:

- Significant reduction in the amount of time and expense required to prepare Test Solutions – “lean labs”
- Ensure consistency of products (independent, traceable Certificates of Analysis)
- Produced according to relevant Pharmacopoeia requirements – no deviation in materials or methodology
- Manufactured under controlled processes and batch certified to ensure lot-to-lot consistency and reproducibility of results

Such benefits give you the assurance and peace of mind that in house preparations cannot provide. We can manufacture other customized test solution formulations to suit individual requirements – just ask us for details.
